

Adjustable Length Spring Bayonet Style RTD

Part # Builder

Construction Notes:

- Stainless steel construction with fiberglass or Teflon insulated stranded wire.
- The probe tip is 3/16" diameter and our standard unit is approximately 3/4" long
- Adapters are NOT furnished with RTD probes and must be ordered separately. (See page 27)

Optional Notes:

- For other wire construction types, consult a sales engineer.
- For 6" spring add option Z165 at end of part number
- For 12mm & 15mm metric caps please consult ECS
- Add "Z175" to the end of part # for **no spade lugs**

Consult ECS for these other options:

- Values other than 100 ohms (500 ohms, 1000ohms, etc.)
- Class A elements

Example:

RBT08-1-B48-EH100-2

The example calls out a spring type adjustable style, 48" long stainless steel braided leads, and fiberglass insulated leads, with a two-wire construction.

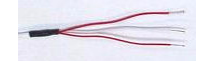

Adjustable Length Flex-Armor Bayonet Style RTD

Termination Styles

Code	Description
14	Stripped Leads 
15	Standard RTD Plug 
16	Standard RTD Jack 

Lead Length ("B" Dimension)
Enter the lead length in "inches"

Curve: Ohms Change Per °C
Specify curve

Code	Description
E100	.00385 400°F
EH100	.00385 800°F
A100	.003916 400°F
AH100	.003916 800°F

- NOTES:**
- Same as spring but not as flexible
 - Cap turns along the entire length.
 - Not as much spring tension
 - Flex-armor hose acts like a spring

Construction Notes:

- Stainless steel construction with fiberglass or Teflon insulated wire inside the flex-armor.
- Probe tip is 3/16" diameter tube and is approximately 1/2" long.
- Adapters are NOT furnished with the RTD probes and must be ordered separately.

Optional Notes:

- For other wire constructions types, consult a sales engineer.
- For 12mm metric cap consult

Consult ECS for these other options:

- Values other than 100 ohms (500 ohms, 1000ohms, etc.)
- Class A elements

Example: RBT08-14-EH100-2

The example calls out an adjustable length, 48" long flex armor cable type RTD, with Fiberglass insulated leads, and a two-wire construction.

Notes:
 -24 gauge wire for 1/8" diameter
 -Adapters are NOT furnished with thermocouples and must be ordered separately
Example: RCT38-11-A4-B48-E100-3
This example calls out a compression style RTD, with 48" Teflon insulated leads, 3/16"OD probe, 4" insertion length with a 3-wire construction.

Consult for these other options:
 -Values other than 100 ohms (500ohms, 1000ohms, etc.)
 -Class A elements

Rigid Style RTD

Example: EH100-2-304-12-3-P

This example calls out a 100-ohm .00385 curve, 3/16" OD probe, 304 stainless steel, 12" long, 3 wire, with a male plug.

RMT28-9	3/4”	6”
RMT28-10	1”	6”

Other Bolt Sizes and Probe lengths available

When building a part number:

Specify:

- 1) Catalog number
- 2) Curve, “EH100” .00385 European Curve
“AH100” .00392 American Curve
- 3) Number of wires 2,3,4

Notes:

- Consult for these other options:
- Larger Diameters
- Values other than 100 ohms (500 ohms, 1000ohms, etc.)
- Class A elements

Optional Notes:

- Consult for other “A” (probe) lengths, as well as other “L”(bolt) lengths.

Example: RMT28-1-EH100-3

This example calls out at meltbolt style RTD, with a 3” bolt, flush tip, a .00385 curve, with a 3 wire construction.

Meltbolt Extension Style RTD

Fiberglass Insulated	"A" length	"L Length
Catalog Number	Probe Length	Bolt Length
MT28-21	Flush	3"
